

I recently subscribed to XM radio because I am tired of listening to all of the commercials, unnecessary talk, etc that are on the local stations here in Orlando. I drive to work in the mornings and I do not want to be stressed out by all of the nonsense that I hear on the local stations...I know, I can turn it off right?....but I want to listen to music to help with the everyday humdrum of traffic here. If the local stations could provide less talk and fewer commercials as they advertise, it would be different, but a couple of songs to at least 10 to 20 minutes of commercials or talk is way too much to ask to listen to. I'm willing, as a consumer, to pay the extra cost of excellent broadcasting and to listen to what I want to. We're Americans right? Land of the free... Please do not take this right away. Please reject the NAB's Petition 04-160. Thank you, Sonya Frymyer, Registered Nurse.
